

Procedural and operative skills :

The following lists the minimal requirements to be met by the trainee with graded responsibility accorded during the 3 semesters.

Key:

- O Washed up and observed
- A Assisted a more senior surgeon
- PA Performed procedures under direct supervision
- PI Performed independently
- OI Observed when opportunity existed

The below suggested categories, level of training and number are minimum requirements. The students / teachers are encouraged to advance these further to the best of their abilities and also strive to gain experience in many procedures that are not listed.

Procedures	Category	Number
Fetal surveillance		
Electronic Fetal monitoring	PA/PI	
Ultra sound scan	PA/PI	
Doppler	PA/PI	
Fetal invasive procedures		
CVS	A/PA	
Amniocentesis	A/PA	
Cordocentesis	A/PA	
Others	A/PA	
Therapeutic procedures	OI	
High risk deliveries	O	
	A	
	PA	
	PI	
Internal Iliac Artery ligation / Embolization	OI/A	
Cervical stitch	A/PA	
Post partum haemorrhage	A/O/PA	
DIC	O/PA/PI	
Central Venous line Insertion	O/PA/PI	
Invasive arterial monitoring	O/PA/PI	
Ventilatory care of the pregnant women	O/PA/PI	

Cases to be managed

Number of cases of each of the following, managed or assisted during the fellowship:

1. Severe PIH/ Eclampsia
2. APH
3. Diabetes
4. Heart disease
5. Neurological problems/epilepsy
6. Respiratory disease
7. Anemia
8. Fetal anomalies
9. BOH
10. Liver problems including jaundice
11. Pre term
12. Post term
13. IUGR
14. Multiple gestation
15. Puerperal problems including DVT/CVT/ARF/Sepsis
